

White Paper

Lapland Mineral Gold Token

Lapland Mineral Gold Token (LMGT) is a gold-backed token whose value exists derived from the underlying asset it represents.

In our case, "LMGT" means Gold claims assets based on the exclusive irreversible partnership with mining companies that have committed not to mine these gold assets in question out of the ground and get remunerated by that.

Gold as tokenized assets

We now live in an age of negative interest rates, bailouts, bank runs, devaluation of government-backed fiat currencies, widespread financial fraud, record levels of debt, and a general lack of financial literacy across the globe. Gold has historically acted as humanity's life-preserver during times of economic calamity in the past and will once again take on this role.

What has Gold to offer

Today, we have more options than ever before to help preserve capital and access critical investments like Gold. LMGT serves as one of the first investment vehicles to harmonize the new era of blockchain technology and the time-tested asset of Gold. We created LMGT to offer astute investors a way to gain access to Gold claim assets as an investment without the negative environmental effect of mining and the burden of physically storing and securing the Gold itself. Lapland Minerals Inc will allow owners of LMGTs to begin to use Gold as a currency again, allowing the digital realm to offer utility in the form of frictionless and immutable payments to and from anywhere in the World.

The companies and team members behind Lapland Minerals Inc and its investors carry many years of experience in traditional and digital finance, mining, and blockchain-based operations. We have created LMGT to allow investors to gain a stable asset while controlling their financial destinies. The decentralized nature of our token that runs on a blockchain means the power is put back into the hands of the people, where it belongs.

We will walk through the history of Gold, how it is a perfect fit for token-backed up assets and why that has led to the advent of Lapland Minerals.

History of Gold

Gold has fascinated humans

Gold has fascinated humans from the first moment it was discovered and continues to do so today. There is simply no other asset, precious metal or otherwise, that has captivated every culture through every period of our civilization like Gold has. The timeless nature of the metal is brutal to put into perspective when considering that it has influenced our decision-making in various fashions dating back to 40,000 BC.

Gold's journey throughout the ages is one with many twists and turns, highs and lows, yet it somehow always maintains its universal allure to us.

Whether it be in the form of jewelry, money, or industrial use, the history of Gold is nothing short of fascinating. The first widespread use of Gold by a civilization occurred with the ancient Egyptians around 3000 BC. Gold held a special place for the Egyptians and found its way into their well-documented mythology, used in their most sacred structures, and even became a complex type of money.

One of the first recorded currency exchanges was erected by the Egyptians, giving way to what we refer to today as the Gold to silver ratio. The initial exchange rate between the two iconic metals was one gold piece for every 2.5 silver pieces. As Gold became ubiquitous in their culture, further examples emerged as the Egyptians began to source lands far and wide for new precious metal deposits.

The Kingdom of Lydia was the first recorded civilization to use Gold as a direct source of currency. In contrast, the Egyptians weaved Gold into their already established agricultural forms of money. Later on, the ancient Greek culture adopted Gold as a direct form of currency and glorified it as an asset fit for the gods themselves, enshrining the metal as one of the essential pieces of their culture. The Aztec and Incan cultures also coveted Gold for the same reasons, using it as a status symbol to denote the various classes of people within their civilization.

Gold dominance

Gold maintained its dominance across humanity throughout the times of the bible and Jesus himself, throughout the Roman empire, and continued during the dark ages. The United States Congress also saw Gold as a critical asset in politics, passing the Mint and Coinage Act, giving Gold a fixed price of the US dollar, allowing gold and silver coins to become legal tender. Gold maintained its importance to the Americans during and after the US civil war, giving way to the resulting gold rush of the 1870s. Gold once again took center stage through the Great Depression and the first two World Wars, with the 1944 Bretton Woods agreement giving way to a new gold standard.

Gold in center stage lasted until 1971 when then-president Nixon took the World off of the gold standard, maintained today. We now exist in a debt-based financial system, with every government printing their currency into near oblivion, amassing debts that are not possible to pay back, and creating malinvestment in virtually every sector of business.

Gold is again coming to the forefront of people's hearts and minds as it regains its pivotal role as the universal safe-haven asset for humanity. Owning Gold is quite possibly the most pragmatic decision an individual and nation can make, with many countries now amassing record amounts of the precious metal.

World in debt

With the World now awash with debt, negative interest rates, and bailout after bailout, Gold has once again led the way as the de facto haven asset that has stood the test of time. As we enter into a new decade, Gold is already beginning to ascend. More and more nations are actively stockpiling Gold of any type, falling back on the time-tested tradition of having a hard currency and asset at their fingertips. The demand for physical Gold is growing daily, with significant instability in the paper gold market. We now are witnessing the decoupling of the paper gold derivatives market from the physical gold market.

This current gold market leaves an opening for a new transparent, cryptographically secure asset that fully represents Gold for what it is. We created our gold-backed token to act as a utility-based currency linked to the price of physical Gold. It means that anyone can now invest in a non-security-based digital asset that gives you 100% coverage as an alternative to owning physical Gold. The World will continue to covet physical Gold, and we are now witnessing the advent of digital Gold in the new economy. Unmined Gold stays in the ground but guarantees the value of the assets.

Blockchain technology

The whitepaper for Bitcoin was published in late 2009 by Satoshi Nakamoto, and the World has never been the same since. Creating a decentralized ledger that is a record of account, a cryptographically secure payment rail that also serves as the underlying currency using this system, Bitcoin began to draw attention. Year after year went by, and so grew the hash rate on the Bitcoin blockchain, as did the price of Bitcoin.

Slowly but surely, the consciousness of what blockchain meant to humanity came into focus. In 2014 a shift away from Bitcoin as the focus and what blockchain technology can do began to occur. The first fiat-backed up stable coin, Tether, was created, initially called realcoin, and for the first time, the US Dollars did not divest themselves entirely out of cryptocurrency. What is more, investors can now keep their digital US Dollars out of a bank and in their possession. Today, the next most popular type of stablecoins is for commodities like oil, precious metals, and other rare and valuable materials.

These investments are becoming incredibly popular as more and more of our reality moves into the digital realm. Blockchain technology gives the security, ease of use, frictionless nature, and speed of the payments all make for a compelling alternative that many investors are looking for today. As a result, most world governments are now openly embracing blockchain technology and cryptocurrency, many looking to create their digital fiat currency. The time is now for a digital asset primed to lead the World into the new era of digital finance.

LMGT features.

LMGT offers people the best of both worlds - access to the physical gold mineral that is secure in the ground and the ability to use Gold as a functional token for daily commerce, as it once was used. LMGT is a gold-backed token fractionalized to 10,000 units per kilo, meaning each LMGT contains 0.1 grams of Gold.

- Can be purchased with Bitcoin, USDT, or Ethereum.
- Fractionalized to 1 / 10,000th of a kilo of the gold mineral claim.
- A finite number of 1.2 billion [BEP-20 tokens](#) on the Binance Smart Chain.
- LMGT can be sent instantly for a near-zero transaction fee, is anonymous, and protects your privacy.
- Can be stored online or offline.
- Censorship resistance.
- Immutable transactions.
- Will be launched on supported exchanges traded between other cryptocurrencies and fiat.

IMPORTANT CONSIDERATIONS

Please read this section carefully. It contains essential information about the nature, purpose, and limitations of this whitepaper, as well as what you acknowledge, accept, and agree to should you choose to read this whitepaper.

Lapland Minerals Inc has prepared this white paper for the benefit of LMGT, any affiliate or related entity of Lapland Minerals Inc, and any natural or legal person or entity associated with them (collectively, LMGT Associates).

This white paper is not legally binding and only used for marketing. It is also not a representation or warranty of any kind by any LMGT Associate, including about any LMGT Associate, the token, or any services, products, or operations of any LMGT Associate.

The information in this white paper does not constitute an encouragement, inducement, advice, or recommendation by any person to purchase the LMGT. Neither Lapland Minerals Inc nor any LMGT Associate has authorized any person to make any such encouragement, inducement, advice, or recommendation. Nothing in this white paper shall constitute a prospectus of any sort or a solicitation for investment. The white paper is not in any way pertain to an offering. It is not a solicitation of an offer to buy any securities in any jurisdiction. Any sale of LMGT or any related instrument will occur only on Lapland Minerals Inc's terms of sale and service, which are available (as of the date of this white paper) and may be withdrawn or modified. Interested parties should, amongst other things, conduct their investigations and

analysis of LMGT and Lapland Minerals Inc and seek further information and professional advice as to its use and value. In particular, persons contemplating purchasing LMGT should review the Terms, including the risk disclosure statement, and form a part of the Terms. The Terms will apply to purchasers regardless of whether they purchase tokens directly from Lapland Minerals Inc or in a secondary market transaction.

Restricted Persons.

The sale of LMGT is not directed towards, and each purchaser of tokens is required to represent, among other things, that they are not: (a) a citizen, resident (tax or otherwise) of, a person located or domiciled in, or any entity organized in or owned by certain persons in (i) the United States, or (ii) Cuba, Democratic People's Republic of Korea (North Korea), the Government of Venezuela, Iran, Pakistan, Syria, or Crimea (a region of Ukraine annexed by the Russian Federation); (b) a person under the age of 18 years, and (c) any other persons who are "Prohibited Persons" as defined in the Terms (any such person falling under (a), (b) or (c), a Restricted Person). Therefore, it would be best if you made your assessment of your ability to purchase LMGT according to laws applicable to you and confirmed that you are not a Restricted Person. No registration or other

action has been or will be taken in any jurisdiction that would, or is intended to, permit the sale of LMGT in any country or jurisdiction where registration or other action for that purpose is required.

None of Lapland Minerals Inc or any LMGT Associate makes any representation or warranty to any potential purchaser of tokens as to the legality of purchasing tokens by such purchaser under the laws applicable to such purchaser.

Purchaser Sophistication.

LMGT is speculative and involves a high degree of risk and uncertainty. The sale of LMGT is aimed solely at persons who have sufficient knowledge and understanding of blockchain and cryptographic tokens and other digital assets, smart contracts, storage mechanisms (such as digital or token wallets), and blockchain or distributed ledger technology. These people can evaluate the risks and merits of the purchase of LMGT and bear the risks thereof, including loss of all amounts paid and loss of all LMGT purchased. After making such investigations as they consider necessary, potential purchasers must independently assess their merits and suitability for purchasing any LMGT. In addition, potential purchasers should consult their accounting, legal, tax representatives, and advisers to evaluate the economic, legal,

and tax consequences of purchasing LMGT.

No Representations, Warranties, or Liability. Recipients of this white paper must not rely on the information contained in it or any inferences drawn from it. Purchasers of LMGT must determine the information they require and base any decision on their knowledge, investigation, analysis, and advice, not on the information contained in this white paper.

No LMGT Associate makes or purports to make, and each now disclaims, any representation, warranty, condition, covenant, or undertaking (whether express or implied) in any form whatsoever to any entity or person, including any representation, warranty, or undertaking concerning the truth, accuracy, and completeness of any of the information set out in this white-paper. In particular, no LMGT Associate makes any representation or warranty (whether express or implied) as to the accuracy or the completeness of the information contained in this white paper. No one of them has any liability for any statement, forecast, information, or matter, express or implied, arising out of or contained in or derived from, or for any omission from this white paper or any other information communicated to any person concerning or in connection with the matters contained in this white paper.

Further, to the maximum extent permitted by any applicable laws, no LMGT Associate shall be liable for any direct, indirect, special, incidental, consequential, punitive, or other losses of any kind in tort, contract, equity, common law, or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this white-paper or any part thereof. For clarity, no regulatory authority has examined or approved any of the information in this white paper.

Further, no such action has been or will be taken under the laws of any jurisdiction. Lapland Minerals Inc reserves the right to modify and replace LMGT from time to time at its sole discretion and has no obligation to update this white paper, including to reflect any such modification or replacement.

Private Presentation. Neither this white paper nor any part of it can be reproduced, distributed, or disseminated by any person other than those authorized to do so by Lapland Minerals Inc.

In each case, such materials must include this section.

This white paper, and any part or copy of March 31, 2022, © Lapland Minerals Inc, 2022 of it, must not be taken or transmitted to any country where this white paper's distribution or dissemination is prohibited restricted at law or by Lapland Minerals Inc.

Forward-Looking Statements Certain statements in this white paper may constitute forward-looking statements or speak to

future events or plans. These forward-looking statements or information involve known and unknown risks and uncertainties, which may cause actual events to differ materially. Therefore, no reliance should be placed on any forward-looking statements or information.

Risk Factors. Purchasing the LMGT entails risks, and purchasers could lose their entire purchase amount or all of their LMGT tokens. Specific risks are described in the risk disclosure statement referenced in and form a part of the Terms.

Your Promises, Representation, and Warranties By accessing, receiving, or accepting possession of this white paper (or any part of it), you acknowledge, agree, represent, and warrant to Lapland Minerals Inc that:

- (1) You have read and understood the risk disclosure statement that is referenced in and forms a part of the Terms;
- (2) That you are not a Restricted Person;
- (3) The distribution or dissemination to you of this white paper and any part of it, or its receipt or acceptance by you, is not prohibited or restricted by the applicable laws in your jurisdiction. Where any restrictions concerning your receipt, approval, or possession are relevant, you have and will observe and comply with all such conditions at your own expense and without liability to any LMGT Associate;
- (4) all of the matters set out, referred to in these Important Considerations, are accepted and understood by you.
